Subject: POT - CLIENT #9'S EMAIL ADDRESS - Marine Corp deteriorating

Gerry, I thought this would serve as a good start to when we get together again. Today I am at our stone home in the CNF, most likely meeting up with a couple of new friends down in Anza Borrego to view the spring flowers – I think the husband is one of those “roaming CEOs” that “angel investors” that people like you and me place in high tech start-ups, when of course we are busy with other things.

This Monday will most likely be a good time assuming President Bush would also like to “pick my brain”.

Please let me know ASAP so I can make my plans accordingly.

Thank you

Ps – it will take me about 72 hours to remove you from my email **list** given how your email address is now backed **up** on multiple secured servers.

BTW would you be surprised if someone as senior as a US Navy Admiral was not made aware back in 1997 by the Clinton Administration of a very large Chinese

vessel, most likely not hiding for a moment it belonged to the Chinese Navy, passed by Pt Loma well within binocular sights all the while our most sophisticated nuclear submarines, Los Angeles class, were docked but under their own power; and as a military man you would know, assuming this were true, of what words the Admiral would mouth when notified by the captain of the submarine of such an extraordinarily unimaginable event?

In other words, were the Chinese who set the scholastic levels wherever they go to have picked up just the most faintest electrical system coming from not just one of the United States of Americas most advanced fast attack nuclear submarines, very possibly carrying nuclear weapons, and of course I wouldn't know for sure since I don't have any top secret clearance from any military or intelligence gathering organization such as the CIA or Mossad, wouldn't that mean the entire class of such important submarines were now beyond belief exposed and none of us apart from the Chinese would know and I doubt they would say a word which says a lot wouldn't you think about what you would be thinking if you were a Navy person on board any one of our submarines.

Now also just lets say a fine young American just minding his own business on the top deck of such a submarine just happened to be observant and when seeing such a foreign vessel approaching, unaware of the distinct possibility that satellites had been observing our most advanced fast attack submarines even if Bill "Rhodes DeBeers Scholar Lawyer" Clinton was preoccupied at the time in the Oval Office with the likes of Monica, and alerted the Officer of the Day who wasted no time in confirming such an again unimaginable sight, well within US territorial waters who in turn when seeing the Chinese flag flying high notified the Captain who while commanding the total shutdown of more than just this one not exactly inexpensive most advanced nuclear submarine got on the phone of course with the Admiral who you would have expected to have "blown a fuse" or "tTOo" [sic], but at the end of the day received in their record a "Bravo Zulu" which you would also know of course is the equivalent of "Job well done".

I have copied my close colleague Devin Standard to possibly help you get to the bottom of this given how Devin has very close contacts at the highest levels of the US Navy including an African American Rear Admirable who was on one of Devin's boards of directors.

Given the problems I am having with my various email accounts that I use regularly it is possible you and I might not be able to reach one another via email for a few more days. You can, however, try reaching me on my one cell phone, 1-858-735-6398 [SEL-NEXT].

Ps I – I am also carbon copying Mr. Jeffrey R. Krinsk of Finkelstein & Krinsk since he lives in Point Loma and has the most perfect view of the US Navy base and it is possible that he and/or one of his 7 odd gardeners including the head gardener of Japanese decent may have seen something very strange some 11 odd years ago.

By The Way, do you think it is "farfetched" that the US Navy would deliberately build beginning in 1967 a swastika shaped building on Coronado Island where the US Navy SEALs are based, thinking it wouldn't offend say the Israeli Navy?

You might also already know by now that my one American attorney of umpteen years, King Golden Jr. Esq. and I were involved with a laser switching research company located in Sorrento Valley, San Diego and prior to us winning a million dollar settlement from Westinghouse Corporation who at the time owned CBS after Westinghouse tried to steal proprietary technology that was first used to protect the eyesight of US submarine commanders from Russian commanders firing lasers which once detected by our technology had the periscope the US submarine captain was looking through shutting down in picoseconds, 12 to the minus 8 and better.

Not to mention yet again King and I first met when he was General Counsel for the major Defense Contractor Science Applications International Corporation back in 1981 just before King's "bosom buddy" Roger W. Robinson joined the National Security Council in March 1982 where "our Man Roger" and his close pal Sec. James A. Baker III were in fact running President Ronald W. Reagan's first administration.

Interesting, wouldn't you agree that King, a close neighbor of THE IT, is a left of left Democrat-Socialist and "Our Man Roger", the protégé of De Beers banker David Rockefeller, is as right of right as they get, but what King and Roger have also in common is their love for pot.
